CONDUIT PIPES

'Emtube' PVC Conduit is the perfect solution for enclosing and protecting cables and wiring for electrical applications, due to PVC's resistance to breakdown under high electrical voltage. 'Emtube' Conduit Pipes are resistant to weather, chemical rotting, corrosion, shock and abrasion. Processed fully on automated machines with stringent quality control measures in place, our products are ISI certified. Only virgin PVC goes into the making of 'Emtube', offering better quality, better fire resistance, and better shock resistance and 100 % recyclable and environment friendly.

FITTINGS

We have the expertise in wide range production of world class accessories, which are of ISI standards and are durable enough to adapt to all kinds of conditions.

BENDING

'Bending of conduit up to 25 mm diameter can be carried out cold, using bending spring or bender of correct size; and for conduit sizes over 25 mm diameter, hot bending is required with the same procedure. (No open flame should be used for heating, use hot air torch or hot water).The bending should not be done too fast and a bend once made should not be forced backwards, as this action can lead to damage of conduit or spring.

GARDEN HOSE

'Emtube' Garden hoses are manufactured from advanced quality Virgin PVC raw material with the inclusion of an adequate quantity of processing oil and other compounding ingredients for ensuring fine flexibility and extraordinary durability. Ideally suited for low-pressure conveyance or delivery of water, 'Emtube' Garden hoses are designed and manufactured in a manner that minimal or no amount of fungus is accumulated during its working and also has the ability to neglect water blockage while pulling the hose.

EMTUBE

SUCTION HOSE

'Emtube' suction hoses are manufactured from a mix that contains Virgin Poly vinyl chloride used as basic raw material and other compounding ingredients. 'Emtube' Suction hose is unique and distinctive in its phenomenal quality and outstanding properties and ensures strength and flexibility.

quality policy

Emtube's sustainable PVC pipes are durable and provide a long life expectancy that benefits both building owners and the environment by lowering the demand to produce replacement systems.
